Report on Mongo DB Course

About

Title of the Event	Certification course on Mongo db
Resource Person(s)	ICT Academy
Date	May 2024
Student Attended	BCA Students
Faculty coordinator(s)	Santhosh R S Yatish S J

Objective(s) & Outcome(s)

Objective(s)

1	Introduction to NoSQL and MongoDB: To introduce participants to NoSQL databases and explain the core principles that differentiate MongoDB from traditional relational databases.
2	Data Modeling and Schema Design: To teach the concepts of data modeling in MongoDB, including the creation of databases, collections, and documents, along with schema design best practices.
3	MongoDB Security: To explain best practices in MongoDB security, including user authentication, authorization, and encryption techniques.

Outcome(s)	**1**	Proficiency in MongoDB Operations: Learners will be able to perform all core database operations in MongoDB, including creating databases, collections, and documents, as well as executing CRUD (Create, Read, Update, Delete)
	2	Understanding of NoSQL and MongoDB: Participants will understand the difference between NoSQL and traditional relational databases, and recognize the key benefits of using MongoDB for certain types of applications, such as handling unstructured or semi-structured data.
	3	Effective Data Modelling: Participants will gain the ability to design efficient data models in MongoDB, applying best practices for organizing and storing data to ensure high performance and scalability.
