Excel 2016: Core Data Analysis, Manipulation, and Presentation; Exam 77-727

Successful candidates for the Microsoft Office Specialist Excel 2016 certification exam will have a fundamental understanding of the Excel environment and the ability to complete tasks independently. They will know and demonstrate the correct application of the principle features of Excel 2016. Candidates will create and edit a workbook with multiple sheets, and use a graphic element to represent data visually. Workbook examples include professional-looking budgets, financial statements, team performance charts, sales invoices, and data-entry logs.

MOS 2016 certification exams introduce a new performance-based format for improved testing of a candidate's knowledge, skills and abilities using the MOS 2016 programs:

- MOS 2016 exam task instructions generally do not include the command name as in previous versions. For example, function names are avoided, and are replaced with descriptors. This means candidates must understand the purpose and common usage of the program functionality in order to successfully complete the tasks in each of the projects.
- The MOS 2016 exam format incorporates multiple projects.

Objective Domains

About Microsoft Excel

Microsoft Excel gives businesses the tools they need to make the most of their data. And when it comes to making the most of resources, and maximizing return on investment, this is becoming increasingly important. Firms are collecting ever-greater volumes of data from multiple sources, including in-store-transactions, online sales and social media. They need to be able to collate and analyze this information quickly and effectively.

Excel spreadsheets are commonly used across business to display financial information and other data relevant to the running of the business. This could be information relevant to the customer relationship management department, sales, marketing or HR. With so many business functions now reliant on IT and the internet, Excel continues to be seen as a vital tool for administration and the effective running of a business.

Course Goal

This course is aimed at exposing participants to the use of Advanced Excel Tools, formulas and features in intensive data analyses.

Objectives of the course:

1. To teach participants the advanced formulas as well as how to use which formula for which occasion.
2. To equip participants with the knowledge on how to debug and audit the advanced formulas.
3. To explore the magic of analysing data using Advanced Excel

At the end of the course, participants should be able to:

- Preparing Data in a Structured way.
- Format of data to required output using different set of formatting tools such as Conditional Formatting, Format painter, Office Clipboard, Format as table, Cell Styles, Headings, etc.
- Apply Conditions such as If, AND, IFAND, COUNTIF, SUMIF, AVERAGEIF, COUNTA, IFERROR, MIN, MAX, MEDIAN, MODE, VLOOKUP, HLOOKUP, CONCATENATE, LEFT, RIGHT, MID, UPPER, LOWER, PROPER, TRIM, INDEX, MATCH.PMT, etc.
- Use advanced techniques for report visualizations such as charts, sparklines, Pivot tables, Hyperlink, Filter, Advanced Filter, Sort, Multiple Sort, Header & Footer, Macros, Freeze panes, Data Table, Goal Seek, Scenario manager, etc.
- Leverage on various methodologies of summarizing data
- Understand and apply basic principles of laying out Excel models for decision making.

The Centre of Excellence is a joint initiative between Cisco and RV College of Engineering, Bengaluru, to set up an environment that would empower young minds through knowledge and training for enhancing employability, research and innovation in emerging field of Internet of Things (IoT).

The Center of Excellence is a joint initiative between Cisco and RV College of Engineering, Bengaluru, to set up an environment that would empower learning minds through knowledge and training for enhancing employability, skills, research and innovation in emerging field of Internet of Things (IoT)

CISCO is funding globally to create skillful resources and helping the academics and industry to build a ecosystem addressing the future needs of industry.

Part of the activities, initially RVCE-CISCO Center of Excellence in IoT is offering wide variety of training programs for student / faculties and professional at various levels for both in private and government sectors. Subsequently facilities are created to experience the technologies on campus for continuous learning and development of IoT solutions. Students / Faculties and Professionals will be exposed to the hardware, software and facilitated by necessary infrastructure to innovate IoT products and solutions through incubations. Variety of training programs will also be made available on MOOC based in future to address the larger and remote learners needs.

We are writing on behalf of the IoT application Development Team where we have designed the training program targeting beginners and advanced level learners.

Please go through the Syllabus. List of Experiments, Hardware, Software Tools, Technologies, Frameworks and Projects that we are introducing to the participants during the training program.

Also we would be customizing if there are any specific needs.
